DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the battery charger must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2875

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, and 4 are rejected under 35 U.S.C. 102(b) as being fully anticipated by JP-2001-320461 to Sasaki Yasuhiro. An accessory illuminating device of a mobile phone with camera lens and a switch for illumination means is disclosed by Yasuhiro.

Regarding claim 1;

An illuminating device of mobile phone (figure 1, 1) comprising camera lens (figure 4, 5), illuminating device switch (figures 1,2,3 and 6, 41) to selectively turn lamp on and off and produce illumination in direction of camera lens (figure 4, LEDs 3 face same direction as camera lens 5).

Regarding claim 3, according to claims 1 or 2, wherein lamp is disposed on at least two positions of the mobile phone (figures 1, 2, 4, two LEDs 3).

Regarding claim 4, according to claims 1 or 2, wherein illuminating device is coupled to battery through a circuit (claim 1)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2001-320461 to Sasaki Yasuhiro.

Regarding claim 2, JP 2001-320461 to Sasaki Yasuhiro discloses the claimed invention except for the illuminating device is an independent base embedded and fixed to the mobile

Art Unit: 2875

phone. It would have been obvious to one of ordinary skill in the art at the time of the invention to have the illuminating device is an independent base embedded and fixed to the mobile because it has been held that the mere fact that a given structure is integral does not preclude its consisting of various elements and does not make the claimed invention patentable over that prior art (Nerwin v. Erlichmen, 168 USPQ 177, 179 [PTO Bd. Of Int. 1969]).

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2001-320461 to Sasaki Yasuhiro in view of USPN 5,592,066 to Fan. Yasuhiro does not disclose a battery charger

Fan teaches the use of a battery charger in a mobile phone. . It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Yasuhiro with the battery charger of Fan. The reason as stated by Fan is that the power of the battery will gradually die out when the times of usage increases so having a battery charger eliminates the problem.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is US 2004/0085745 to Yoshihara.
